## Toy Offers Comments on State of the State Address

LANSING – Senator Laura Toy, R-Livonia, offered the following comments on tonight's State of the State Address:

"I agree with Governor Granholm that early childhood programs are essential to providing developmental opportunities for children age zero through five. I would encourage her to think outside the box in determining how to implement the programs during these tough economic times. I am glad that my experience and education in child psychology from the University of Michigan will enable me to be a leader on childhood development programs in our Caucus, and look forward to ensuring that children have the resources they need to succeed in life."
